My College Tracker

FOR COUNSELORS

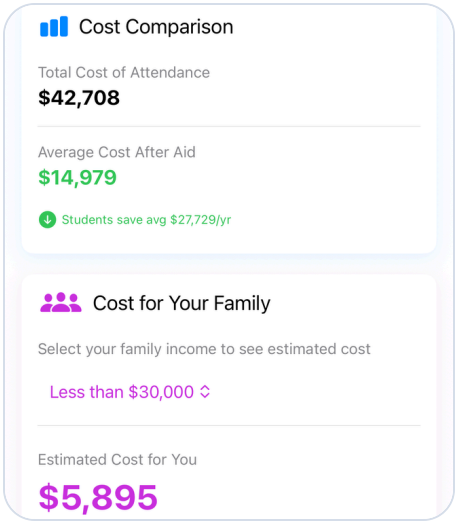

Help every student build a smarter college list.

A free app for iPhone, iPad and the web, with **real numbers for 2,000+ U.S. colleges** – acceptance rates, cost after aid, graduation rates – and **AI Search** that turns a sentence into a filtered list.

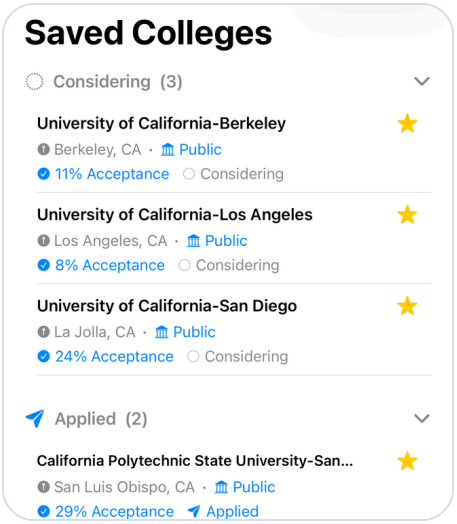

Search in plain English

Type **"Selective private universities in California"** and AI Search turns it into filters – state, college type, admission rate, major – that students can adjust.

See what it really costs

Sticker price next to the **average cost after aid**, plus an estimate for the family's income range – from federal College Scorecard data.

Track every application

Save colleges, compare two side by side, add notes, reminders and deadlines, and track each application's status in one place.

A 10-minute list-building exercise → try it in your next meeting

1. Describe the kind of college you want in **AI Search**.
2. Save 8–12 colleges with a mix of acceptance rates: reach, target and likely.
3. Open each one's **Aid** tab and pick your family's income range to see the estimated cost.
4. **Compare** your top two side by side.
5. Update each **status** as applications go out.
